

# Labor - Execution Budget

The Execution Budget (EB) is the amount of money for [Labor](#) that the project team has to execute the project. It is equal to the total Labor (LB) amount of the contract to which we subtract the [Margin Objective](#) (MO) of the labor component.

$$EB = LB - MO_{labor}$$

Because the Margin Objective might change during the course of execution, the Execution Budget can also change. In any case, the project team's objective should always be to spend less or equal than that amount.
