Anatomy Of A Conduite Application

Conduite applications are Google Spreadsheets. They are organized in sheets, each one of them having a specific purpose. In order to make this easier for the users, sheets are grouped by color, corresponding to a specific purpose.

Sheets of the Project Dashboard application

Color	Purpose
Yellow	Sheets with configuration data specific to the application (contract data, workstreams, ...). Only for CRM, Budget Builder and Project Dashboard applications. These sheets are mostly used when setting up the application.
Green	Sheets where users perform the actual data entry for the application. These are the most used sheets.
Purple	Read only sheets that provide statistics, summarized data and tables. These sheets are used in conjunction to the green ones.
Blue	Sheets with global configuration data (rates, roles, contract types, ...). These sheets are mostly used when setting up the application.

Color	Purpose
Red	System sheets. Read only. Hidden by default. **Must not be modified**.
